

PRATIK RAY

Junior Security Engineer

+917632098603 @ cloud.pratik01@gmail.com https://www.linkedin.com/in/pratik-ray-9030761b1/ Bengaluru, 560054, KA

SUMMARY

Junior Security Engineer with over 1+ year of hands-on experience in application security, API pentesting, WAF engineering, and automation. Skilled in uncovering critical vulnerabilities, improving remediation cycles, and building internal tools that optimize manual VAPT processes.

EXPERIENCE

Junior Security Engineer

Formidium

- 12/2024 - Present Bengaluru, KA
- Led manual VAPT across applications, network, and infrastructure to map risk exposure, uncovering and prioritizing 25+ critical vulnerabilities, and reducing high-risk exposure by 40%.
- Authored detailed vulnerability reports (with reproducible steps, risk ratings, and remediation), improving developer understanding and cutting remediation time by 35%.
- Onboarded Appknox as the mobile security platform. Integrated automated scans into release workflow. Configured assessment policies and triage process, boosting detection accuracy by 30%.
- Deployed and operationalized Cloudflare WAF by migrating traffic from AWS WAF + Route 53, configuring managed rulesets, enabling bot protection, and exporting logs to AWS S3—reducing false positives by 50% and improving overall threat visibility.
- Developed an internal recon automation script integrating Subfinder, FFUF, Nuclei, and httpx to speed up target enumeration and vulnerability discovery.
- Enhanced testing tool chains and playbooks, automating key parts and optimizing processes to boost testing coverage by 60% and reduce manual effort by 50%.

CyberSecurity Trainee

Formidium

- 09/2024 - 11/2024 Bengaluru, KA
- Performed initial VAPT using AppCheck automated scanning, triaged findings, and manually validated high-risk issues using Burp Suite and browser-based testing.
- Created developer-friendly vulnerability documentation with impact details, PoC steps, and remediation guidance.

Volunteer experience

Seasides Conference

- 02/2025 - Present Goa

EDUCATION

Bachelor's of Business Administration

RIBS (Bengaluru City University)

- 2020 - 2023 Bengaluru, KA

PROJECTS

Multi-Layer Authentication for Critical Infrastructure

- 12/2024 Bengaluru, KA
- A project aimed at enhancing the security measures for critical infrastructure through advanced authentication methods.
- Spearheaded an initiative to strengthen the security of critical infrastructure by implementing a multi-layer authentication system for AWS EC2 instances.
- Documented the entire implementation process, providing detailed guidelines for future reference and facilitating knowledge transfer.
- Successfully deployed Two-Factor Authentication (2FA) using Google Authenticator on EC2 instance, significantly elevating the overall security posture.
- Documented the entire implementation process, providing detailed guidelines for future reference and facilitating knowledge transfer.

SKILLS

Application Security

- Application Security API Pentesting
- Mobile Security OWASP Top 10
- Threat Analysis
- Authentication & Session Testing

Cloud & WAF Security

- AWS WAF AWS S3 AWS IAM Basics
- Cloudflare WAF Route 53 Migration
- Traffic Filtering Rule Tuning

Security Tools & Automation

- Burp Suite Pro AppCheck MobSF
- Nmap FFUF Metasploit Nikto
- Linux Jira Python Bash
- Appknox

CERTIFICATIONS

- INE - eWPTXv3
Web Application Penetration Tester extreme

- The SecOps Group- (C-AI/ML Pen)
Certified AI/ML Pentester

- TCM Security-Practical Bug Bounty
TCM Security

- TCM Security-Practical Ethical Hacking
TCM Security

- Cisco
Introduction to Cybersecurity
